

6+ Years Eng & Product

AI-Native Shipping (Claude Code / Cursor)

Stack: TS, React, Node, Postgres

SKILLS

PRODUCT OWNERSHIP

0→1 Product Engineering, Roadmap Co-Shaping, Problem Discovery, Metric Definition & Outcome Accountability

CORE TECH STACK

TypeScript, React, Node.js, PostgreSQL (Supabase/SQL), Next.js, Convex, Python, REST & GraphQL APIs

AI-NATIVE SHIPPING

Claude Code, Cursor, OpenAI / Claude / Gemini APIs, Agentic Engineering, Prototype-as-Spec Workflows

CUSTOMER INTELLIGENCE

Usage Data Mining, Telemetry Analysis, Direct User Advisory, B2B SaaS Support Signal, Retention (+40%)

ENGINEERING QUALITY

Shared Tooling & SDKs, Architecture, Code Reviews, Design Specs, Automated Testing, High-Throughput Systems

LEADERSHIP & VOICE

Cross-Functional Alignment (CS/Sales/Leadership), 8+ Years Remote Execution, Async Design Docs

EXPERIENCE

LeverBrain · Decentralized AI skill marketplace

FOUNDER & CEO

Jan 2024 – Present

- AI-Native Shipping & Prototyping: Operated as sole product engineer using Claude Code and Cursor to ship an AI skill marketplace from zero to production, compressing weeks of spec-writing into days of prototype-as-spec iteration.
- Full-Stack Architecture (TypeScript, Next.js, Convex/Postgres): Built low-latency capability card rendering, metadata caching, and real-time backend state using TypeScript, Node, and edge functions with sub-50ms render times.
- Customer Intelligence & UI Execution: Mined telemetry data and conducted direct customer advisory calls to refine agent capability specifications; designed and shipped a clean, accessible web app and CLI tool.
- Engineering Quality & Tooling: Built cryptographic wallet verification, on-chain token payment ledgers, and reusable SDKs/CLI tooling to enable engineers and AI agents to ship seamlessly.
- Tech stack: TypeScript, React, Next.js 15, Node.js, Convex (DB & Edge Functions), Solana (Anchor/Rust), Tailwind CSS, Claude Code, Cursor.

Sigma Club · AI-powered learning platform

FOUNDER & PRODUCT LEAD

Jun 2023 – Present

- Product Ownership & Roadmap Co-shaping: Independently scoped and architected an AI collaborative learning platform; pushed back on scope creep to land a functional MVP in customer hands in **under 4 weeks**.
- Outcome Accountability & Retention Metrics: Defined user retention benchmarks before launch and owned feature performance, driving a **40% increase in user session retention** via personalized learning paths and gap analysis.
- Full-Stack Stack Fluency (TypeScript, React, Node, PostgreSQL): Built the complete full-stack codebase in TypeScript, React, and Node.js backed by PostgreSQL (Supabase), integrating Anthropic Claude and Google Gemini APIs.
- AI-Native Workflow: Leveraged Claude Code and Cursor for prompt engineering and rapid prototyping, accelerating feature delivery 3x while maintaining production-ready code standards.

DeFi/Web3 Consulting · Protocol audits & yield strategies

LEAD ARCHITECT & SPECIALIST

Jan 2019 – Present

- **Technical Leadership & Audits:** Led deep technical audits, protocol security analysis, and smart contract architecture for decentralized finance (DeFi) systems.
- **Outcome & Commercial Ownership:** Designed and executed the day-one launch of a custom NFT platform, generating **\$50k+ in net profit within 7 days** with zero security vulnerabilities.
- **Cross-Functional Voice & Design Docs:** Authored clear technical design docs and project specifications for executive leadership, engineering teams, and external auditors.
- **High-Performance System Engineering:** Built token-gated community platforms featuring real-time Web3 wallet authentication, on-chain indexers, and automated membership verification.

E-commerce Business · Digital utility store

FOUNDER

Jan 2017 – Dec 2021

- **Customer Intelligence at Scale:** Founded and scaled a profitable B2B digital store serving Amazon sellers, directly analyzing support signals and usage patterns to build targeted digital utility tools.
- **End-to-End Product Execution:** Directed product design, automated customer support pipelines, and marketing funnels, maintaining solo profitability for 4 consecutive years prior to acquisition.

FinTech Platform · Loan comparison engine

PRODUCT MANAGER & ENGINEER

Mar 2016 – Nov 2017

- **Product Ownership for 50,000+ Users:** Managed product roadmap and contributed frontend React/TypeScript code for a FinTech loan comparison engine serving over 50,000 US consumers.
- **Cross-Functional Leadership:** Led sprint planning, backlog grooming, and remote team workflows across 3 continents, establishing async communication protocols for distributed execution.

EDUCATION

Higher School of Economics · Russia · BSc Economics

Sep 2012 – Jun 2016

Focused on quantitative analysis and financial modeling. Deepened software engineering and web development skills during studies, pursuing building independent products from zero.
